

## ABSTRACT OF THE DISCLOSURE

5

A method in a wireless communications network connected to  
a packet network including receiving (410) at a packet server handover  
information, e.g., neighbor measurements, from a wireless communications  
device, negotiating (420) with the radio communications network, e.g., with  
10 a base station controller, for a radio resource transfer for a mobile wireless  
communications device, and sending (440), from the packet server, radio  
resource information to the mobile wireless communications device.
